/note="Vector: pspor1; Site_1: Sal1; Site_2: Not1; RNA was prepared from a pool of 6 anonymous Wilms' tumor RNAs. RNA was prepared by acid-phenol, followed by one round of oligo dr selection. CDNA library preparation was with the BRL/Life Tech. Superscript Plasmid system. An oligo-dr Not1 primer for first strand synthesis generated geggeccc(t) at the 3' end of the clones. A 5' Sall adaptor was used with sequence 5'-gtogacccagegtccg-3' Resulting cDNAs were size selected (average size 2 kb), Not1 digested, and ligated into Not1/Sall-cut pspor71. Library was constructed by Dr. Manfred Gessler."

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            DENGATOR Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Primates; Catarrhini; Hominidae; Home.; Loases 1 to 355)

Adams, M.D., Kerlavage, A.R., Fleischmann, R.D., Fuldner, R.A., Bult C.J., Lee, N.H., Kirkness, E.F., Weinstock, K.G., Gocayne, J.D., White, O., Sutton, G., Blarke, J.A., Brandon, R.C., Man-Wai, C., Clayton, R.A., Ciline, T.R., Cotton, M.D., Earle-Hughes, J., Fine, L.D., Fitzgerald, L.M., Fitzhugh, M.M., Fritchman, J.L., Geoghagen, N.S., Glodek, A., Gnehm, C.L., Handa, M.C., Heddlom, E.L., Hinkle, P.S.JT., Kelley, J.M., Moreno-Palanques, R.F., McDonald, L.A., Nguyen, D.T., Pelligrino, S.M.,
                                                                                                                                                                                                                                                                  /note—Vector: lambda pSB; Site_1: BamHI; Site_2: ECORI; First strand cDNA was primed with an anchored Xhor1-Oligo(dT) primer [5'6GAGGATCGAGCGGCGCGCAGGAGGAG(T)VN 3'; V-A.C.G.; N-A.C.G.T] and then dG tailed. Second strand was primed with a BamH1-dC primer [5'AGAGACTCGGATCGGGCCGCAATAATAATAATAAT(C) 3']. Double-stranded cDNA was then digested with BamH1 and Xhor and directional olicod into the BamH1 and sites of lambda pSB vector. Library went through one round of normalization. Library was constructed by Wei

/note="Organ: pooled; Vector: pT7T3D-Pac (Pharmacia) with
a modified polylibrar; Site_l: Not I; Site_2: Eco RI;
Equal amounts of plasmid DNA from three normalized
libraries (fetal lung NbH13W, testis NHT, and B-cell
NCL_GAP_GCB1) were mixed, and ss circles were made in
vitro. Following HAP purification, this DNA was used as
tracer in a subtractive hybridization reaction. The driver
was PCR-amplified CDNAs from pools of 5,000 clones made
from the same 3 libraries The pools consisted of

Following HAP purification, this DNA was used as tracer in a subtractive hybridization reaction. The driver was PCR-amplified CDNAA from pools of 5,000 clones made from the same 3 libraries. The pools consisted of I.M. A.G.E. clones 297480-302087, 682632-687239, 726408-728711, and 729096-731399. Subtraction by Bento Scares and M. Fatima Bonaldo. "

Double-stranded cDNA was ligated to Eco RI adaptors (Pharmacia), digested with Not I and cloned into the Not I and Eco RI sites of the modified pT7T3 vector. Library is normalized. Library was constructed by Bento Soares and M. Fatima Bonaldo. "

/note="Organ: prostate; Vector: pT7T3D-Pac (Pharmacia)
with a modified polyllnker; Plasmid DNA from the
normalized library NCI_CGAP_Pr22 was prepared, and ss
circles were made in vitro. Following HAP purification,
this DNA was used as tracer in a subtractive hybridization
teaction. The driver was PCR-amplified cDNAs from a pool
of 5,000 clones made from the same library (cloneIDs
985608-986759, 1101192-1101959, and 1217928-1220615).
subtraction by Bento Soares and M. Fatima Bonaldo. "

polylinker; Site_1: Not 1; Site_2: Eco RI; NCI_CGAP_Sub6
is a subtracted library derived from BW, which consists of
a mixture of four normalized libraries: NCI_CGAP_Sub6
library had 7 million recombinants. A single-stranded DNA
preparation of BW was used as a tracer in a subtractive
hybridization with a driver comprising: the IMAGE pool
NCI_CGAP_Lui3 pool 1 LLAM 334-3377, 3682-3683,
